March 26 — Understanding the 2009 Economic Stimulus and Other Challenges and Opportunities for Medical Group Practice

MGMA President and CEO, William F. Jessee, MD, FACMPE, will host this member Webinar to address the changing environment facing medical group leaders in 2009. The American Recovery and Reinvestment Act of 2009 legislation allocated billions in electronic health records incentives and ushered in numerous new HIPAA privacy modifications. Get information relevant to your practice from national health care thought leader Dr. Jessee as he guides you through the Stimulus Package, national administrative simplification initiatives and critical MGMA resources designed to help you guide your group through these challenging times.

Issues addressed during this 75-minute Webinar include:

- Impact of the economic downturn and credit crunch on group practices, such as changing patient behavior, decreasing practice revenue and modified business operations
- Contents of the American Recovery and Reinvestment Act of 2009 and ways in which it will affect your practice
- Information on how your group may take advantage of HIT incentives
- National administrative simplification initiatives that can save your group money
- How MGMA can assist your group in meeting these challenges and taking advantage of opportunities

MGMA Members – Complimentary
State MGMA Members - \$49
Nonmembers - \$199
